

We are reaching the end of Biobridges, what a great journey it was!

We are reaching the end of BIOBRIDGES, what a great journey it was! The links and bounds established within the consortium itself and between the consortium and external stakeholders were without a doubt productive and a good sign of the impact achieved.

The links and bounds established within the consortium and between this consortium and external stakeholders was without any doubt very satisfactory and a good sign of the impact achieved.

This was indeed the biggest non-technical barrier that we had to deal with and some adjustments were made to the project, like for instance going from onsite events to online workshops. Always Always in collaboration with our project officer at BBI JU and following the inputs received during the project review, we came up with a set of results that make us proud. In fact, for a Coordination and Support Action, we produced an impressive number of assets that will be the legacy of our project. These assets are grouped by Studies, analysis and methodologies; Communication and awareness campaigns; Connections and networking; Policy papers and recommendations; Data.

Enjoy your reading and...

based on these assets, we expect to stay in contact with all of you in the future.

At Biobridges we don't like goodbyes, so let's just say "see you soon".

BIOBRIDGES' LEGACY:

DISCOVER HOW BIOBRIDGES RESULTS CAN BENEFIT YOU!

The BIOBRIDGES assets are available for free to anyone interested in fostering the bioeconomy in Europe, with more cooperation, more awareness and more action! We did our best to develop analysis, methods, formats and materials easily reusable by all interested stakeholders in a wide spectrum of activities.

Bio-based economy: consumers had their say!

How much are consumers aware of bioeconomy and bio-based products? Why would they buy or not bio-based products? And in which sectors? How much are they willing to pay? The BIOBRIDGES survey gives you reply (and design recommendations too).

Available soon: BIOBRIDGES policy paper with recommendations on how to improve public acceptance of bio-based products and processes

Even though many policy makers are convinced of the bioeconomy's environmental, economic and social added value, it turns out that citizens are not always equally enthusiastic, or even reject the concept. Different factors, or a combination thereof, can be attributed to this resistance.

BioHeroes, helping us to disseminate the bioeconomy

We have a necessity to use simple, concrete and applicable in real life messages based on solid scientific evidence and involvement of recognised bioeconomy proponents: this is the rationale of our BioHeroes.
